ARPEGGIONE

*The most recent recording of the **Jones&Maruri** violoncello/guitar duo. This double disc album includes first world recordings and a rare recording of the "Arpeggione Sonata" by Schubert in a cello&guitar version. **A unique collectors album.***

LUYS DE NARVÁEZ

Maruri favors a muscular approach with a nice range of color and dynamics and an expressive rubato. (...) Frankly, just as I prefer Bach on piano, I prefer vihuela works on the guitar, as long as the performance is committed and expressive. Maruri is both. (American Record Guide, January 2014)

THE ANDRÉS SEGOVIA ALBUM

*The recording of Segovias's compositions is fascinating... **But the best reason to get this recording is Maruri's performance.** (...) The first notes I heard sounded eerily like the Maestro's old Decca recordings... (American Record Guide. Vol. 73, nº3)*
